

## **BVSWMA Special Waste Policy**

Definitions and treatment of special waste are covered under 30 TAC 330.136 & 137. The following is the BVSWMA definition of such waste as adapted from the TNRCC regulations.

Receipt of the following special wastes does not specifically require written authorization from the TNRCC, but will be subject to the handling restrictions determined by the Brazos Valley Solid Waste Management Agency:

- Dead animals and/or slaughterhouse waste
- Non-friable asbestos containing material
- Empty containers which have been used for pesticides and other containers which previously contained flammable, reactive, corrosive, or petroleum chemicals provided they have been triple rinsed.
- Soils contaminated with gasoline with TPH less than 600 ppm.

The remaining special waste transporters, which are mostly from an industrial source, must first obtain an authorization letter from the TNRCC, a waste code number, and authorization number (which the generator should have) before the Rock Prairie Road Landfill will consider accepting the waste. This information must accompany the special waste forms that you will return to BVSWMA. These special wastes include:

- Any Class II industrial non-hazardous waste
- Waste from oil, gas, and geothermal activities
- Grit trap wastes
- Any type of sludge
- Soils contaminated by petroleum products, crude oils, or chemicals other than gasoline

**\*\* BVSWMA does not accept any Class I industrial waste.**

The following procedures shall be followed by parties desiring to dispose of special waste in the City of College – BVSWM Rock Prairie Road Landfill:

1. Contact the BVSWM Environmental Compliance Officer to discuss special waste in question. The BVSWM Special Waste Packet will be mailed or faxed to potential customer at this time.
2. Submit the following:
  - A written request in letter form to the Environmental Compliance Officer describing the waste, it's origin, the quantity to be disposed of, the process that generates the waste, the method of delivering the waste to the landfill, and any other significant information about the waste.
  - The *TNRCC Request for Authorization for Disposal of a Special Waste* form and the *Waste Transporter Report* form.
  - Documentation of the chemical analysis (analytical data) for the waste from an approved laboratory. The chemical analysis submitted must not be more than three months prior to the submission of the written request.
3. The Environmental Compliance Officer will review the information and then submit the request to the TNRCC for approval. If the request is approved by the TNRCC, the request will be reviewed to ensure that the waste is in compliance with the terms for submittal, the nature of the waste and landfill operational impacts. If approved, BVSWM will provide the generator with a permit stating the acceptance and the terms for acceptance. Hauler must present a copy to the letter to the scale operator upon entering the landfill. BVSWM reserves the right to deny approval for any special waste request regardless of TNRCC approval.
4. The approved waste generator should provide the landfill operator with a bond, letter of credit, or cash deposit for the duration of time that the waste will be entering the landfill to provide for any remedial actions or special provisions that may need to be provided.
5. All special waste approved for disposal will be subject to inspection and testing upon arrival at the landfill. If any sample gives cause for material to be rejected, the permit will become invalid and no further deliveries will be accepted. Further, the bond, credit, or cash deposit will be drawn upon to cover the costs of investigation and possible remediation that may be necessary due to loads already delivered.

:

Instructions for completing form TNRCC-0152  
Request for Authorization for Disposal of a Special Waste

Generators should complete the form TNRCC-0152 in its entirety. For items which are not applicable to the request, the generator should insert the words "not applicable" or "N/A."

A. General Information

Generator - The name of the generator or facility which generated the waste for which the request is submitted.

Generator Mailing Address - The mailing address of the site at which the waste was generated.

Generating Site Location - The physical address or location of the site at which the waste was generated.

Generator Contact - Name of the person who is employed by or represents the generating facility. Telephone and fax number should be included.

Representative Mailing Address - Address of the person submitting the request. Telephone and fax number should be included.

Description of Waste - Brief description of the waste for which the request is submitted. Description should include the material, major contaminant and source of contamination.

Description of Process Generating the Waste - A brief description of the process which caused the material to become a waste.

Requested Volume of Waste - Volume of waste to be disposed. Generator must report this volume in *cubic yards only*.

List attached available chemical analysis results, Material Safety Data Sheets, and/or any process knowledge used to characterize the waste. The generator should list the information that has been attached to support the request for municipal landfill disposal. Generator should include all information utilized to demonstrate that the material met the requirements for landfill disposal. The information can be a combination of analytical data, process knowledge and material safety data sheets. If a generator submits analytical data, he should also submit the following accompanying information:

1. Sample documentation
  - a. frequency of sampling;
  - b. description of how material was sampled; and
  - c. equipment utilized to sample;
2. Quality control and quality assurance data for each analysis;
3. Identification of analytical methods performed; and
4. Chain of Custody document.

Briefly describe any Recycling, Reuse and/or Waste Minimization efforts-  
A description of how the generator is reducing the amount of waste that he generates and increasing his recycling efforts.

Texas Registration Number- Industrial generators must complete this section. The 5 digit Solid Waste Registration number assigned by the TNRCC should be included here. Non-industrial generators and generators whose waste is under the jurisdiction of the Railroad Commission of Texas may write in "non applicable" in this item.

Texas Waste Code- A Texas waste code is required for the shipment of all industrial wastes.

Requested Destination of Waste (Municipal Solid Waste Landfill)- The name of the landfill in which the waste is to be disposed. The requestor shall also include the landfill permit number and the landfill telephone number. Requests are site specific and waste specific. A request for change of disposal site must be resubmitted.

B. Waste/Chemical Composition

Percentage of materials which comprise the waste

Physical Characteristic of Waste- Process state of waste to be disposed

Free Liquid- Certification of the presence or absence of free liquids.

(Free liquids are prohibited from landfill disposal)

Flash Point- Flash point measured for the material to be disposed.

pH- pH for the material to be disposed.

Requestor MUST sign and date the form prior to submittal to the TNRCC Special Waste Team.

**TEXAS NATURAL RESOURCE CONSERVATION COMMISSION**  
**Request for Authorization for Disposal of a Special Waste**

*This form facilitates the request for authorization to dispose of a Special Waste into a Municipal Solid Waste Landfill. Please complete and return to: MSW Permits Section/MC 124, Waste Permits Division, P.O. Box 13087 Austin, TX 78711-3087 or fax to (512) 239-6000. For questions, please call the MSW Permits Section (512) 239-6724.*

## LANDFILL DISPOSAL POLICIES

---

1. Hours of operation: 7:00 AM - 5:00 PM Monday-Friday / 7:00 AM - 1:00 PM Saturday
2. The current posted gate rate is \$23.50 per ton, however this fee is subject to change at any time.
3. All loads must be covered with a canvas, tarpaulin, or other covering that is firmly secured to the front, back, and sides to prevent blowing or spilling of the solid waste. Haulers who fail to comply with this policy will be subject to a \$10.00 per ton charge with a \$10.00 minimum fee.
4. All commercial and residential transporters must provide route maps and waste information statements prior to dumping. If providing a route map is not possible (as in the case of roll-off containers), then the transporter shall provide a trip ticket at the scalehouse which shall state the origin of each specific load as it enters the landfill.
5. All credit customers must sign a statement stating that they will be held responsible for removal of any non-allowable wastes of which they dispose at the landfill, and that to the best of their knowledge, they certify that they are not carrying any hazardous waste.
6. All customers will be responsible for removal and all applicable surcharges associated with handling, storage, and removal of non-allowable wastes that are brought to the landfill by their vehicles.
7. Non-allowable wastes are those materials which have been prohibited by the Texas Municipal Solid Waste Code (30 TAC 330) from entering municipal solid waste landfills. Other non-allowable wastes include items that may be restricted on a case by case basis by BVSWMA due to the specific physical or chemical properties of the waste.
8. All transporters exiting the landfill site with non-allowable wastes will be required to stop at the scalehouse and sign waste exit forms which will be filled out by a BVSWMA employee.
9. All vehicles entering the Rock Prairie Road Landfill with waste will be subject to screening. If the driver refuses screening he/she will not be allowed to utilize the Rock Prairie Road Landfill for future waste disposal.
10. Dewatered sludges will only be accepted before 2:00 PM on Monday-Friday with an 80 ton per day limit.
11. All transporters are responsible for knowing and understanding the local state and federal regulations regarding waste transportation and disposal.
12. Residential customers of Bryan or College Station should contact their respective sanitation department in order to obtain the current city policy regarding residential disposal at the landfill.
13. A \$10.00 surcharge will be assessed for all large household appliances or any unit containing CFC's such as refrigerators, freezers, or air-conditioning units.
14. A surcharge will be assessed for the handling of whole tires. The charge is \$3.00 for tires up to 19.5" in diameter, \$8.00 for tires 19.5" to 24.5" in diameter, and \$20.00 for tires over 24.5" in diameter.

## **PROHIBITED WASTE ITEMS**

Following is a list of prohibited waste items that will not be allowed into the Rock Prairie Road Landfill:

1. (Friable) Regulated and (non-friable) non-regulated asbestos containing material (RACM);
2. Liquid waste and waste found to contain free liquids as determined by the "paint filter test" required by TCEQ;
3. Lead acid batteries;
4. Fluorescent light, ballasts and capacitors and mercury vapor lamps;
5. Compressed gas containers which have not been punctured;
6. Barrels over 5 gallons which have not had the top removed;
7. Hazardous waste as listed in 40 CFR 261 (federal legislation);
8. Characteristic hazardous waste as determined by EPA tests which determine ignitability, corrosivity, reactivity, or toxicity;
9. Non-household size chemical containers that have not been triple-rinsed;
10. Used oil;
11. Used oil filters;
12. Class I industrial waste;
13. Liquid paints;
14. Medical waste that is not properly treated, prepared, and handled according to Subchapter Y of the Texas Municipal Solid Waste Code which covers medical waste management (30 TAC §§ 330.1001-330.1009)
15. Computer monitors, printers and CPU's
16. Any special waste which does not have previous approval from the landfill operator or environmental compliance officer, nor a special waste form on file;

If you have any questions about these or any other waste contact BVSWMMA at 979-764-3806.

## WASTE TRANSPORTER REPORT

Customer name: \_\_\_\_\_ Date: \_\_\_\_\_

Name & title of Contact Person: \_\_\_\_\_

Phone # of Contact Person: \_\_\_\_\_

Are you a generator of special waste? (Y/N) \_\_\_\_\_

(If 'yes' then please be sure to submit the special waste information requested)

Approximate amount of waste to be brought to the BVSWMMA landfill, in tons/month: \_\_\_\_\_

Information on transport vehicle (please attach a separate sheet if there is more than one vehicle):

License #: \_\_\_\_\_

Vehicle ID #: \_\_\_\_\_

Make: \_\_\_\_\_

Capacity in yd<sup>3</sup>: \_\_\_\_\_

Type of vehicle: \_\_\_\_\_

(front end loader, roll-off, etc.)

Please briefly describe the type of waste you expect to bring to the Brazos Valley Landfill (ie. household, office refuse, industrial waste, special waste, construction material, etc.):

---

### BVSWMMA CUSTOMER AGREEMENT

I, \_\_\_\_\_, certify on behalf of \_\_\_\_\_  
(Personal Name) (Customer Name)

that the waste we will be transporting to the Rock Prairie Road Landfill in College Station, Texas does not contain hazardous waste (ex: acids, solvents, petroleum products, paint, etc.), and accept any responsibility for removing non-allowable waste (see list of prohibited wastes) disposed of by our vehicles immediately after discharge if possible, or soon after the discovery to waste. We will pay any applicable storage or handling fees assessed by the Brazos Valley Solid Waste Management Agency. Credit at the landfill is a privilege extended by the BVSWMMA and the City of College Station. Payment of invoices is due upon receipt. Accounts aged over 30 days are subject to surcharges. Failure to pay may result in suspension of credit privileges at the landfill.

I agree to abide by all rules and regulations established by the Brazos Valley Solid Waste Management Agency concerning waste disposal. I further understand that the rates for disposal are set by BVSWMMA and are subject to change at any time as per BVSWMMA action.

I do hereby certify that all statements and representations contained in this application are true, correct, and complete to the best of my knowledge.
